NEW

WALKABOUT FREEZER

 **TARA EXPORTS LTD**
tara@tropex.co.nz

- Save up to 90% of electricity bill
- Maintenance free cheap storage solution
- Portable with Genset option
- 12 month parts warranty (all new refrigeration equipment)
- Stainless Steel rust resistant containers
- **RELIABLE SINGLE PHASE POWERED**

These new economical freezers use only 1.54 kilowatts per hour in freezer mode. That means you can run 4 "Walkabout Freezers" for the same power consumption of one shipping reefer 3 phase.

Built with reconditioned stainless steel 20' reefer container body and new installation of reliable top quality refrigeration equipment. Hundreds in use all over Australasia & Pacific.

POWER SUPPLY

Walkabout Freezer uses the same 240 volt single phase power as your office or household appliances. They can be plugged directly to your power socket or run from a genset in remote areas. Ideal for immediate freezer storage anywhere remote.

Available with new 3 cylinder diesel 9.5kva Genset, sound proofed reliable, giving spare capacity to run other equipment. The Genset is supplied as either a stand beside or **built in** option. (Note storage space is less due to Genset).

GENSET OPTION

These units can be mounted on a truck converting it instantly to a mobile Freezer, and similarly on ships, etc.

Very cheap solution as an instant portable take anywhere Freezer.
